

PRODUCT INFORMATION

BORPower® NanoGreen MS-250

About the product

BORPower® NanoGreen MS-250 has been developed to optimize the function of the motor and to protect in long term. Can be used in all vehicles with four-stroke engine with a capacity of 0-6 liters of oil safely.

BORPower® NanoGreen MS-250 is first in the world, because it's not like many lubricant additives which trigger chemical reactions, but the effect is purely PHYSICAL.

NOT suitable for use in motorcycles with wet clutch, which have a common oil circuit.

NOT for use in 2-stroke engines!

Your advantages

- Improved engine performance
- Reduces fuel consumption
- Minimizes CO2 emissions
- Lower engine oil temperature
- Reduces friction & wear
- Protects against rust & corrosion
- Reduces noise levels
- Soft and Smooth engine running
- Reduces particulate emissions
- Longer service life of the units
- Highly active anti-wear
- Improves cold start
- Excellent runflat

Application

Before using MS-250 (250 ml) leave 10 minutes to warm up your engine. Shake the bottle for at least 2 minutes (the distribution of the nanocrystals). Empty MS-250 in the engine and let the engine run for at least 10 minutes or drive 20 km.

✓ GASOLINE ✓ DIESEL ✓ LPG
